

2018 Pymatuning/Shenango Watershed Challenge

A Penn Ohio Watershed Association & Your local Conservation District event

Amy Reeher, District Administrator/Watershed Coordinator, 330-637-2056, ext. 8624, reehera@embarmail.com

The Pymatuning/Shenango Watershed Challenge is an environmental education competition for students in grades 6-8. The idea is simple – the event combines the concepts of hands-on education with the exhilaration of a good competition and the fun of spending a day in the great outdoors. The result is an effective educational tool with which to nurture environmentally aware students.

This academic competition tests teams of students on their knowledge of natural resources in the following categories: Aquatics, Forestry, Soils, Watersheds and Wildlife. Each category station is managed by someone from that respective category. This allows students to interact with professionals such as professors, soil scientists, wildlife officers, foresters, and naturalists.

Rules, reference materials, registration forms and prizes will be provided by the Penn Ohio Watershed Association and its partners. For more information, contact Amy Reeher at 330-637-2056, ext. 8624 or at reehera@embarqmail.com

October 17, 2018

LOCATION: MUNNELL RUN FARM, MERCER, PA
