Seeing Your Forest Through the Trees: Options & Objectives for your Woods

Timber harvest, maple sugaring, stand improvement, wildlife habitat creation...? Land management decisions don't have to be difficult, but where to start??

It all begins with defining your goals and knowing what options are available! In this virtual program, we'll discuss the "101 level" of NE Ohio forestry, covering tips, terms, and what you 'need to know' as a landowner. Create a clear path to achieving your goals through management planning.

You'll come away from this Woodland Wednesday with a fresh perspective on how to see your forest through the trees.

This virtual program is **FREE**, but registration is required.

This free virtual program will be held on April 7, 6:00 - 7:30 PM
To register visit:
